## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### *Specification*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. Please note that while the abstract can and should characterize all the inventions disclosed, the title should be directed to only the invention of the claims now pending and under examination

### *Claim Rejections - 35 USC § 101*

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific and substantial asserted utility or a well-established utility.

4. The specification as filed does not disclose or provide any evidence that points to an activity for the DNAs such that another non-asserted utility would be well established.

5. The specification teaches that the claimed 19 sequences can be used to identify gross chromosomal rearrangements in closely and distantly related avian species and that "they should be particularly useful for genetic mapping in turkey" (specification at page 8).

6. The aspect of using the 19 nucleic acids so to identify gross chromosomal rearrangements is not considered specific, as the asserted utility is not particular to the sequence being claimed because it would be applicable to the general class of DNAs from the Z chromosome of chickens.

7. The aspect of using the nucleic acids so to map turkey genome is not considered to be a "substantial utility." In order to determine whether or not the claimed DNAs have a substantial utility, it must be determined whether or not the turkey genes have a "substantial utility." Here, the only utility asserted for the DNAs is for identifying and studying the genome of turkeys as well as other avians. This does not define a "real world" context of use.

8. Claim1 is also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

#### ***Conclusion***

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley L. Sisson whose telephone number is (703) 308-3978. The examiner can normally be reached on 6:30 a.m. to 5 p.m., Monday through Thursday.

10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, W. Gary Jones can be reached on (703) 308-1152. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9307 for After Final communications.
